**SMART™-II Anthrax (Spore) Test Kit**

**Bacillus anthracis (spore) Lateral Flow Screening Assay**
*For Environmental Use Only. Not for Human Use.*

**Anthrax (PDF)**

**Features:**
- Less than 20 seconds technician time
- Room temperature storage
- Distinct color reaction on capture membrane
- Proven Technology ---"Desert Storm Tested"

**INTENDED USE:**
This test is designed to detect Bacillus anthracis spore from environmental samples. It is not intended to be used in the diagnosis of anthrax or any other disease.

**CAUTION:**
This test is a rapid, screening assay. No known rapid screening assay is 100% sensitive or 100% specific, therefore results should be confirmed by an alternative method.

**MATERIALS INCLUDED PER POUCH:**
- Anthrax spore Lateral Flow Test Devices
- Plastic Droppers
- Chase Buffer

**COLLECTION KITS NOT INCLUDED:**
(To collect sample, you should use one of the following kits or their equivalent.)

- Large Surface Sample Collection Kit, (SWIPE-1), Reorder No. 87-130001
- Powder/Small Surface Sample Collection Kit, (SWIPE-2), Reorder No. 87-130002
- Liquid Sample Collection Kit, (SWIPE-3), Reorder No. 87-130003
- Air Sampler Sample Collection Kit, (SWIPE-4), Reorder No. 87-130004

If the sample has debris or large particles, it may require use of the SPK:
- Sample Processing Kit: SWIPE-SPK, Reorder No. 87-130100

**ASSAY PROCEDURE:**
CAUTION: For assay to function properly, NHD’s SWIPE or a validated collection system must be utilized to properly collect and process the sample. Failure to utilize a proper collection system may cause false negative or false positive results.
