Pro Strips™

Pro Strips™Pat. Pend. Professional Series - One Device, One Sample, Multiple Threat Recognition

Pro Strips™ Pat. Pend. is Advnt's newest initiative in the war against bio-terrorism. Inspired by HAZMAT professionals, Pro Strips™ is the first and only Hand-held assay designed to detect and identify up to five separate threats using one sample, in one simple to use device.

Advnt guarantees that you will not find an easier, more reliable, more accurate BW Hand-

Held Assay than Pro Strips™

No false positives, and more importantly
No false negatives or hook effect

Performance Specs for Pro Strips and BADD or view our Library for all available data.

Be Prepared

Pro Strips provides an excellent selection of training products for you and your team. Our ATTAK™ trainer kits and threat simulation powders are designed to mimic a bio-threat event, providing you with an opportunity to become familiar with our products prior to using them in a real event.
ThreatDust™ is the newest addition to our training products line. This 3 to 5 micron dust is a non-toxic powder that closely mimics a biothreat agent. Provided in both a positive and negative format, ThreatDust™ can be used in a variety of settings and applications, even air sampling. ThreatDust,™ provides you with a more accurate training scenario with immediate visual readouts of the results you may encounter during an actual response.

Pro Strips™ and ATTAK™ are available in several distinct formats including two simulation/trainer devices and a threat simulation powder.

Pro Strips™ 5 which tests for Anthrax - Ricin toxin -Botulinum toxin - Y. pestis (plague) and SEB's
